
Technology Teaming Opportunities

- Our team strengths lies in specific areas
 - Robust vehicle design
 - Extensive component integration within structure
 - Sensor characterization
 - Optimal sensor combining
 - System engineering
 - Fault management
 - Rapid Prototype Manufacturing
- Looking for collaboration in the following areas
 - Exploration of lidar technologies
 - Solid terrain modeling using optical/vision systems
 - Short range high speed object detection
 - High speed robust data storage
 - Unique algorithms for location determination combining a *priori* map data and GPS/feature sensors
